Hemant Singh

Software Engineer @Oriserve | Ex-Founding Engineer @Ecohodo.ai
| MERN Stack | NestJS | ReactJS | AWS | AI/ML Integration |
Building Scalable SaaS Solutions
Noida, Uttar Pradesh, India

Summary

Full Stack Software Engineer | Building Enterprise-Grade Solutions
with MERN Stack, NestJS, NodeJS & AWS

CURRENT ROLE:

Software Engineer at Oriserve, developing Orimon.ai — an AI-powered enterprise chatbot platform. Building scalable backend systems and intuitive frontends using React.js, Next.js, NestJS, and integrating OpenAI/LangChain for intelligent conversational AI.

CORE EXPERTISE:

- Backend Development: NestJS, Node.js, Express.js, RESTful APIs, Microservices
- Frontend Development: React.js, Next.js, Redux, Tailwind CSS, Responsive Design
- Databases: MongoDB, MySQL, Database Architecture & Optimization
- Cloud & DevOps: AWS (EC2), GitHub Actions, CI/CD Pipelines
- AI/ML Integration: OpenAI, LangChain, Chatbot Development
- Additional: WebSocket, Socket.io, Firebase, Real-time Analytics

KEY ACHIEVEMENTS:

- # Ex-Founding Engineer at Ecohodo Technologies — Built GHG Sync, a complete carbon emissions SaaS platform from scratch, helping enterprises track and reduce their carbon footprint
- # Developed centralized authentication systems and reusable schema libraries that accelerated development across multiple products
- # Successfully deployed and managed production applications on AWS with automated CI/CD pipelines
- # Built BBPS-compliant payment solutions at Plutos ONE using advanced security protocols

Delivered 20+ live projects across fintech, sustainability, SaaS, and e-commerce domains

PASSIONATE ABOUT:

Creating impactful software solutions that solve real-world problems, particularly in sustainability, AI automation, and enterprise SaaS platforms.

OPEN TO OPPORTUNITIES:

Looking for challenging roles in Full Stack Development, Backend Engineering, or Software Engineering where I can contribute to building scalable, high-impact products.

Let's connect and build something amazing together!

Experience

Oriserve

Software Engineer

March 2025 - Present (9 months)

Noida, Uttar Pradesh, India

Building enterprise-grade AI chatbot platform (Orimon.ai) serving B2B clients with conversational AI solutions.

Key Responsibilities & Achievements:

- Architected and developed full-stack features for Orimon.ai using React.js, Next.js, and NestJS, delivering seamless user experiences for chatbot creation and management
- Integrated OpenAI and LangChain APIs to power intelligent conversational AI, enabling automated lead qualification and multilingual customer support
- Built responsive frontend UI from scratch using modern React patterns, Redux state management, and Tailwind CSS
- Developed RESTful APIs and real-time features using WebSocket/Socket.io for live chat escalation and bot performance monitoring
- Implemented Chat Summary, Test & Training modules, and Bot Feedback systems to optimize AI performance and user engagement
- Integrated third-party CRM platforms (HubSpot, Pabbly) and omni-channel support to extend platform capabilities for enterprise clients

- Designed and developed analytics dashboards for real-time tracking of chatbot performance, customer interactions, and conversion metrics

Technologies: React.js, Next.js, NestJS, Node.js, MongoDB, OpenAI API, LangChain, WebSocket, Socket.io, Redux, Tailwind CSS, REST APIs, Firebase

Ecohodo

Founding Engineer

July 2024 - March 2025 (9 months)

New Delhi

- Developing Carbon Emissions SaaS Reporting Products:

Spearheaded the design and development of innovative carbon emissions reporting SaaS products from the ground up, providing comprehensive tools for

environmental impact analysis and reporting.

- Centralized Authentication System Implementation: Engineered and deployed

a centralized authentication server, delivering secure and streamlined access token management for users across the 'Trading' and 'Reporting' platforms within a cohesive ecosystem.

- Open-Source Reusable Schema Library: Designed and released an open-source

schema library on GitHub significantly enhancing development efficiency by eliminating the need for redundant schema code across multiple applications within the ecosystem.

- AWS Deployment and CI/CD Integration: Successfully deployed and managed

two NestJS applications and a React application on AWS EC2. Implemented GitHub Actions for Continuous Integration and Continuous Deployment (CI/CD) optimizing the development workflow and ensuring smooth, automatic deployment of updates

plutos ONE

Software Developer

March 2024 - July 2024 (5 months)

Noida, Uttar Pradesh, India

- Spearheaded the development and integration of Technology Service Provider (TSP) solutions for the Bharat Bill Payment System (BBPS) using Nest.js framework.

- Engineered robust APIs, ensuring seamless integration with BBPS standards and protocols. Implemented security measures, collaborated cross-functionally, and resolved technical challenges, ensuring smooth integration and data protection.

Virtuzo Infosystems Pvt. Ltd.

Junior Software Developer

February 2023 - March 2024 (1 year 2 months)

Noida, Uttar Pradesh, India

- Utilizing expertise in ReactJs, React-Redux and Node.js, API, pivotal contributions were made to the E-Sim Source Project, ensuring the delivery of exceptional solutions that upheld the highest quality standards.

- Consistently achieved client satisfaction by surpassing expectations and delivering projects on time, showcasing strong problem-solving skills and meticulous attention to detail.

- Contributing to the AHBRANDS project, an e-commerce app developed using Ionic Angular, which involves building and designing a user-friendly interface for online shopping and utilizing PHP APIs to enhance functionality and data management.

Ducat Education

Student Trainee

September 2022 - February 2023 (6 months)

Noida, Uttar Pradesh, India

Developed responsive web applications using MERN Fullstack, including a movie site and a clone of the SBI site utilizing advanced technologies such as React.js, HTML5, CSS, JSON, and jQuery, and integrating with RESTful APIs and external web services
